- Remove stock bulb from housing.
- Cut wires to stock bulb and remove from rubber boot Fig 1.
- Modify stock boot by cutting off the three nubs the stock wires ran through, Fig 2. Then cut a $\frac{3}{4}$ " hole in center of boot, Fig 3.
- *Your boot may look slightly different*, but the modifications are the same.

- Place modified boot over front of bulb and fold back.

- Place spring in housing

- Insert bulb into housing. Be sure all three tabs line up before giving a light inward push and a clockwise twist about a ¼ turn, until seated.

- Make sure bulb is in proper orientation.
With emitters facing left and right and the shields on the bottom.
