

Disclaimer: We assume you possess the expertise and relevant tools to work on your machine. We also assume you have the OEM/Stock owner's manual or technical service manual for your machine. If you do not possess the skills, knowledge, or tools necessary to perform the installation of electrical and/or aftermarket parts, please see a qualified service provider.

After determining the mounting location of the tube mounts, use this friction tape to wrap around your mounting location (2 rotations and the tape needs to be stretched to hold) to increase the holding power of the mount and protect the paint on your crash bars.

We have found that it is necessary to use lock tight on the barrel of the mounting platform. Please remove the barrel and clean any manufacturing with alcohol or some other degreaser.

We recommend **RED lock tight** at the barrel joint, **NOT THE SCREW**. Allow to dry prior to riding the bike.
